To be distributed internally to all relevant employees or departments
Should be shared with customers and sales partners as relevant to their needs.

MarCator 1086/1087 Digital Indicators

Notice: New Product

Please review the following important product information updates.

We are pleased to announce that Mahr Inc. is now accepting orders for the new MarCator 1086 and 1087 digital indicators.

The latest generation of MarCator digital indicators offer features such as large display with hardened glass, and the touch operating keys with practical direct functions to make recording measured values easier and more reliable than ever before. The digital indicators are available for a wide range of measuring tasks, both for static measurements and dynamic measurements such as radial runout, straightness and flatness.

The previous models of **1086Ri** and **1087Ri** with buttons, in the measuring ranges of 12.5mm and 25mm, are still available to order.

Features:

- Touch screen
- Rotating display with large LCD
- Measured value classification with colored LED display
- Bidirectional data transfer by USB and Integrated Wireless
